

# Alternative Compliance Tutorial

## Module 3

### Maintaining Your Alternative Compliance Vehicle Inventory

# Alternative Compliance Tutorial

There are five modules in this training package:

- Module 1: Alternative Compliance Overview
- Module 2: Submitting an Intent to Apply for a Waiver
- **Module 3: Maintaining Your Alternative Compliance Vehicle Inventory**
- Module 4: Assembling a Waiver Request
- Module 5: Completing an Annual Report

You are starting Module 3. When you are finished, please proceed to the next module for additional instructions on how to participate in the Alternative Compliance option.

## Module 3: Maintaining Your Alternative Fuel Vehicle Inventory

In this module, you will learn how to maintain your Alternative Compliance vehicle (ACV) inventory. This section answers the following questions:

- What is an ACV?
- What is an ACV inventory?
- How do I maintain my ACV inventory?
- How do I access my ACV inventory?
- What comes next?

## What is an ACV?

The following vehicles are considered ACVs and comprise your ACV inventory:

- Alternative fuel vehicles (AFVs) acquired in previous model years under Standard Compliance
  - Includes those in service for **any part** of the waiver model year
  - Excludes those acquired in excess of AFV requirements (and earned banked credits)
- Light-duty vehicles (LDVs)—conventional or AFV—planned to be acquired in the upcoming waiver model year instead of the AFV requirements that would have been met under Standard Compliance
- LDVs (conventional or AFV) acquired in previous waiver model years instead of the AFV requirements that otherwise would have been met under Standard Compliance
  - Includes those in service for **any part** of the waiver model year

These vehicles must be included in calculating your petroleum reduction requirement.

## What is an ACV inventory?

The ACV inventory is the foundation of the Alternative Compliance option. It is the total of all ACVs that will be in your fleet during the waiver model year.

Fleets participating in Alternative Compliance must maintain their ACV inventories during their waiver model years. This is done after fleets receive U.S. Department of Energy (DOE) approval on their intent to apply for a waiver.

Only fleets that received DOE approval on their intent to apply for a waiver have an ACV inventory. It is created by DOE after it approves a fleet's intent to apply for a waiver for the **first year** the fleet participates in Alternative Compliance. The fleet's ACV inventory remains in place and must be maintained for each subsequent year the fleet participates in Alternative Compliance.

# How do I maintain my ACV inventory?

## First Year

- Retire ACVs no longer in service or acquired in excess of requirements (e.g., earned a banked credit)
- Add ACVs expected to be acquired between the time you submit your waiver request and the end of the upcoming waiver model year
  - Since these are projections, you may need to update this information later (e.g., you may not know the VIN of a new vehicle at the time you enter it)

## Subsequent Years

- Retire ACVs no longer in service or acquired in excess of requirements if you had returned to Standard Compliance
- Add LDVs acquired under either Alternative Compliance or Standard Compliance in the years since submitting your first Alternative Compliance intent to apply for a waiver
- Add ACVs you expect to acquire between the time you submit your waiver request and the end of the upcoming waiver model year
  - Again, since these are projections, you may need to update this information later

## How do I access my ACV inventory?

You can access your ACV inventory online at

[www.eere.energy.gov/vehiclesandfuels/epact/state/acp\\_tool/view\\_acv.cgi](http://www.eere.energy.gov/vehiclesandfuels/epact/state/acp_tool/view_acv.cgi).

*Following is a series of slides demonstrating how to maintain your ACV inventory. Each slide has one or more pop-up text boxes. In the full-screen mode, the text boxes will appear automatically, and you will be prompted when it's time to proceed to the next page. In the window mode, you will need to click to make each text box appear and proceed to the next page.*

This demonstration provides an overview of the process for updating your fleet's ACV inventory.

This demonstration provides an overview of the process for updating your fleet's ACV inventory.

The screenshot shows the login page for the Alternative Compliance Vehicle Inventory. At the top, it features the U.S. Department of Energy logo and the text "Energy Efficiency and Renewable Energy" with the tagline "Bringing you a prosperous future where energy is clean, abundant, reliable, and affordable". Below this is a green banner with "Vehicle Technologies Program" and a red banner with "Energy Policy Act (EPAct)". The main heading is "Alternative Compliance Vehicle Inventory". The instructions state: "Enter the User Name and Password issued for Standard Compliance reporting and click the Log In button." There are two input fields: "User Name:" and "Password:". A "Log In" button is located at the bottom right of the form area.

To get started, go to  
[www.eere.energy.gov/vehiclesandfuels/epact/state/acp\\_tool/view\\_acv.cgi](http://www.eere.energy.gov/vehiclesandfuels/epact/state/acp_tool/view_acv.cgi),  
and log in using your user name and password.

**Vehicles Removed from Fleet = 0**  
**Vehicles Retired due to Banked Credits = 0**

**Close Window**

The first task is to retire vehicles. Under Alternative Compliance, you must retire vehicles if their acquisition resulted in banked credits under Standard Compliance or they are no longer part of your fleet.

**Banked Credit Report**

EPA Act Fleet ID: 1255  
Mark's Test Fleet (NC)

Year	Number of Banked Credits
2001	1
2002	2

To retire vehicles that resulted in banked credits, refer to the banked credit report you receive from DOE.

**Banked Credit Report**

EPA Act Fleet ID: 1255  
Mark's Test Fleet (NC)

Year	Number of Banked Credits
2001	1
2002	2

To retire vehicles that resulted in banked credits, refer to the banked credit report you receive from DOE.

Here we see that your fleet earned three banked credits from vehicles acquired in 2001 and 2002. These three vehicles must be retired corresponding with the model years for which they earned banked credits.

<a href="#">12530</a>	Ford	E250	1999	CNG	1FTNE24ZXXHA96081	1999	2005	Removed
<a href="#">12531</a>	Ford	E250	1999	CNG	1FTNE24Z1XHA96082	1999	2007	Removed

Vehicles Removed from Fleet = 2  
 Vehicles Retired due to Banked Credits = 3

**Close Window**

ACV inventory total now stands at 5.

If you entered a vehicle by mistake, you can remove it the same way you would to retire a vehicle. Click the vehicle ID number and choose "Added in Error" under "Reason Retired." Click "UPDATE" when you are done.

Item 14600 has been changed to "Sierra," and the VIN was corrected.
